What is My Valuation?

We've changed the way that entering your valuation in the SCT works.

We understand that there are some cases where it's not suitable to perform a Rightcheck, but you still want to document the valuation. So we've separated Rightcheck and My Valuation into their own stand-alone sections.

The screenshot shows two distinct sections in a web interface. The top section, titled "My Valuation", contains four input fields: "Application Type" (a dropdown menu with "Select" and a downward arrow), "Lender" (a dropdown menu with "Select" and a downward arrow), "Sales Valuation" (a text input field), and "Rental Valuation (pcm)" (a text input field). A "modify" button is located to the right of the "Lender" dropdown. The bottom section, titled "Rightcheck", features a "check" button and a status indicator consisting of an orange circle followed by the text "rightcheck not performed". At the bottom right of the entire form area, there is a "save and submit report" button.

Due to the importance of the valuation, completing the My Valuation section is now mandatory for the majority of application types in order to submit a report. Rightcheck remains optional.

What if I don't want to share a valuation?

For potentially sensitive cases and investigations, you now have the option to select from two new application types: "Investigation" or "Other". If you choose one of these application types and still enter a valuation (which is optional), the valuation will not be shown in the property's transaction history section.

Application types

Here's a complete list of the application types you can now select from.

The screenshot shows a web form titled "My Valuation". It has several input fields and buttons. A dropdown menu is open for "Application Type", listing options: "Select", "New mortgage", "New mortgage BTL", "Re-mortgage", "Re-mortgage BTL", "Buy-To-Let", "Right To Buy", "HomeBuyer", "Investigation", and "Other". Other fields include "Sales Valuation", "Lender:" (with a "Select" dropdown and a "modify" button), and "Rental Valuation (pcm):" (with an empty text box). Below this is a "Rightcheck" section with a "check" button and a message "rightcheck not perform...". At the bottom right, there is a "save and submit report" button.

If you use one of the buy-to-let (BTL) application types, you'll need to choose a minimum of one rental comparable.

If you perform a rental valuation, you'll still be required to enter a rental valuation. The table below outlines the mandatory fields for each application type.

Application Type	Valuation mandatory field?	Rental valuation mandatory field?	Shows in Property Transaction History?
New Mortgage	Y	N	Y
New Mortgage BTL	Y	Y	Y
Remortgage	Y	N	Y
Remortgage BTL	Y	Y	Y
Buy-to-let	Y	Y	Y
Right to Buy	Y	N	Y
Homebuyer	Y	N	Y
Investigation	N	N	N
Other	N	N	N

Property transaction history

For future SCT's, you'll be able to see whether a Rightcheck was performed in the property's transaction history.

Look out for either:

"Surveyor SCT" – when a report was created for a property and given a valuation, but did not receive a Rightcheck

Or

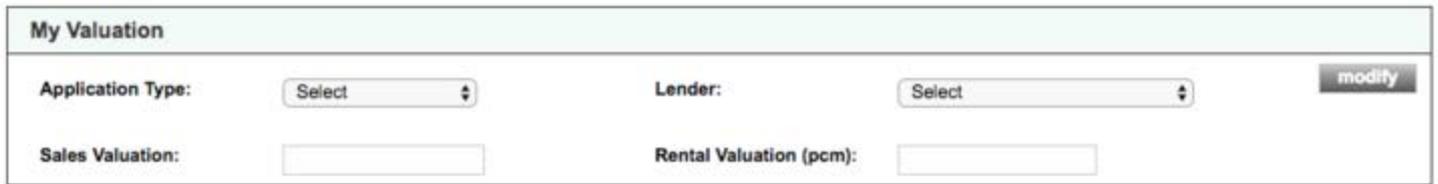

"Surveyor SCT with Rightcheck" - when a report was created for a property, given a valuation and had a Rightcheck run.

Please note that historical SCT's will always show as Surveyor SCT.

Locking fields after a Rightcheck

Once you've performed a Rightcheck after completing your My Valuation section, the My Valuation section will lock. This is to avoid any confusion around the final valuation you want to submit.

Don't worry, you can still modify your valuation. Just click the **Modify** button and it'll unlock the My Valuation fields.

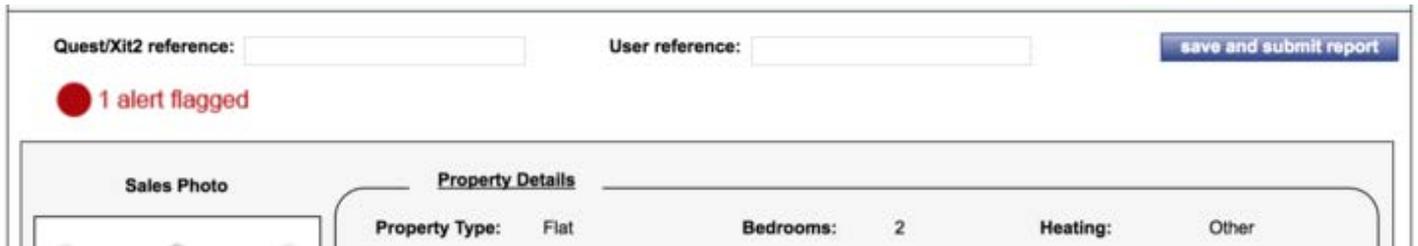

The screenshot shows a form titled "My Valuation" with a light green header. Below the header, there are four input fields arranged in two rows. The first row contains "Application Type:" with a dropdown menu showing "Select" and a downward arrow, and "Lender:" with a dropdown menu showing "Select" and a downward arrow. To the right of these two dropdowns is a dark grey button with the word "modify" in white. The second row contains "Sales Valuation:" with an empty text input field, and "Rental Valuation (pcm):" with an empty text input field.

If you change your valuation fields, but haven't run a new Rightcheck against them, you'll be notified that your valuation and last Rightcheck value are different. You'll get asked "are you sure you wish to continue?" at which point you can still save and submit your report.

Red flags after a Rightcheck

If you receive a red flag on your Rightcheck, you'll still be required to fill in Rightcheck notes before you send and submit or adjust your valuation using the new Modify button.

The screenshot shows a web interface for a Rightcheck. At the top, there are two input fields: "Quest/Kit2 reference:" and "User reference:". To the right of these fields is a blue button labeled "save and submit report". Below the input fields, there is a red circular icon followed by the text "1 alert flagged". Underneath this, there is a section titled "Property Details" which is currently selected. To the left of this section is a "Sales Photo" placeholder. The "Property Details" section contains the following information: "Property Type: Flat", "Bedrooms: 2", and "Heating: Other".

TOP TIP. When your Rightcheck results are produced, remember that you can click on the flag icon to the left of your notification at the top to go directly to the Rightcheck results.
